

ABOUT

Single IBC Bunded Spill Pallet

The Stratex Single IBC Bunded Spill Pallet provides a safe and efficient storage solution for hazardous liquids. A low 700mm working height helps to reduce risks during loading and unloading. It also features handy fork pockets for manoeuvrability. Stratex bunded spill pallets are constructed from rotomoulded polyethylene. The rotomoulding process ensures that the bund has consistent wall thickness, delivering superior strength, durability and chemical resistance. The single IBC bund has a safe working load rating of 1350kg.

FEATURES

- This bund features a low height for ease of use (700mm) Stackable, space saving, innovative, protected design ensures low delivery costs for multiple bunding units.
- Generous working area (2.5m²) for one IBC or multiple small containers.
- Fork pockets for easy movement (Remove IBC and empty spill pallet before moving).
- Optional clip-on dispensing units direct any spills while decanting into the sump, meaning liquids can be retrieved and reused saving time and money.
- All-weather covers for outdoor storage and sump plugs for drainage and spilled liquid recovery available.
- Rotomoulded construction provides superior strength, durability and chemical resistance.
- Dimensions: 700H x 1600W x 1600L mm.
- 1100L Sump.
