

ABOUT

15 Litre Carry Bag Spill Kit

A portable, cost effective option for small spills, the 15L spill kit is packed in a plastic, clip-closed, hi-vis bag with handles for prompt response. Containing sufficient absorbent to contain basic spills, the kit is easy to use and is compact enough to fit in small spaces in your workshop or vehicle, including toolboxes and behind Ute seats. It contains absorbent socks to encircle spills and protect drains and absorbent pads and cushions to absorb the bulk of spilled liquid.

It also contains highly versatile granular absorbent which enables it to absorb spills on both sealed surfaces such as concrete and asphalt, and unsealed surfaces such as gravel and dirt. Personal protective equipment and contaminated waste disposal bags are included for clean-up and disposal. It includes a laminated instruction card for usage guidance, and a reorder form for easy restocking. Stratex Spill Kits are an integral part of compliance with Australian standards and regulations, and our absorbents are quality tested.
