

ABOUT

Contaminated Waste Disposal Bag

Stratex Contaminated Waste Disposal Bags are designed for safe and secure disposal of contaminated and organic waste and used absorbent materials.

The extra-large 700mm x 900mm Bags feature heavy-duty polyethylene construction and have excellent chemical resistance. High-vis yellow in colour, and clearly marked as "Contaminated Waste" to ensure the contents are not mistaken as general rubbish.

Dimensions: 700 x 900 mm x 80um

IDEAL FOR:

- Facilities management and cleaning
- Laboratory and research facilities
- Industrial manufacturing
- Emergency response and clean up
- Waste management and environmental services
- Construction and demolition sites
- Oil and gas industry
- Biotechnology and pharmaceuticals

FEATURES:

- Excellent chemical resistance for hazardous and contaminated materials.
- Highly visible yellow colour to prevent being mistaken for general waste.
- Versatile for a range of different industries.
- Convenient large size and robust construction.
